

# Yellow Comet APC instructions

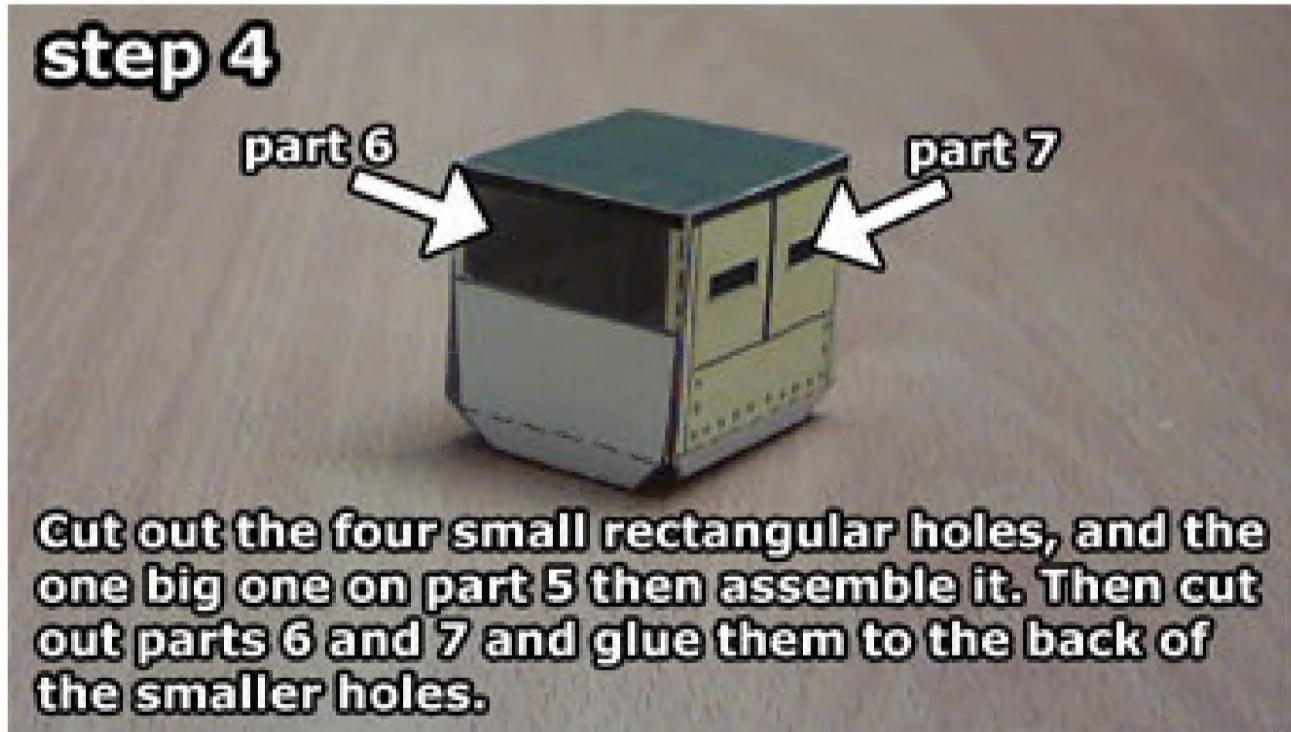

## step 1

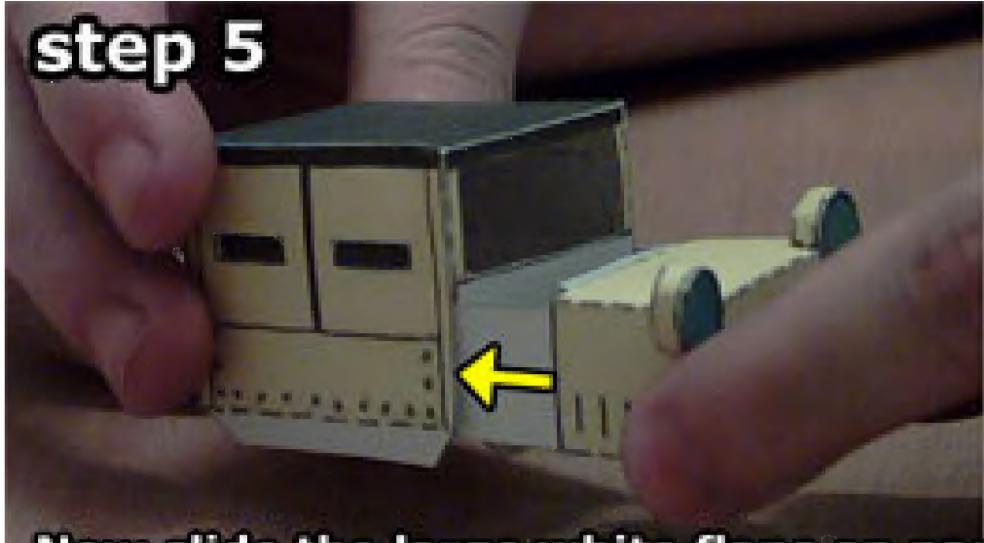

## step 2

## step 4

**step 5**

Now slide the large white flaps on part 1 into part 5, and fold back the smaller flap through the "window" to glue them together.

**step 6**

Now assemble all the bodyparts (parts 8-15)...

**step 7**

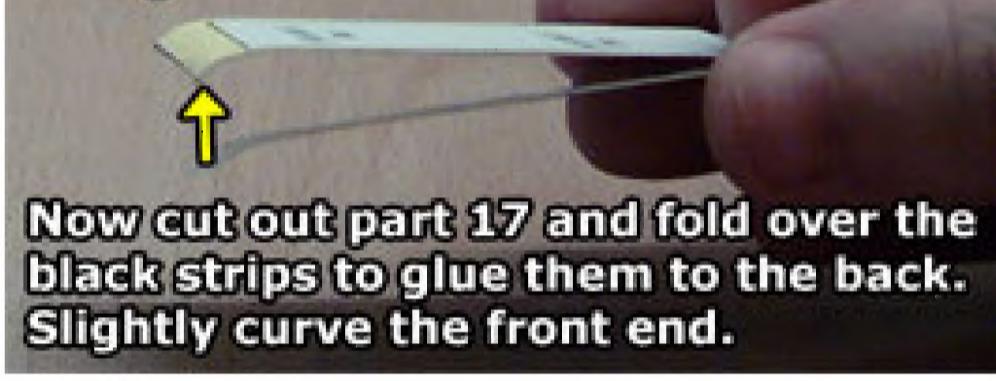

...and glue them together.

**step 8**

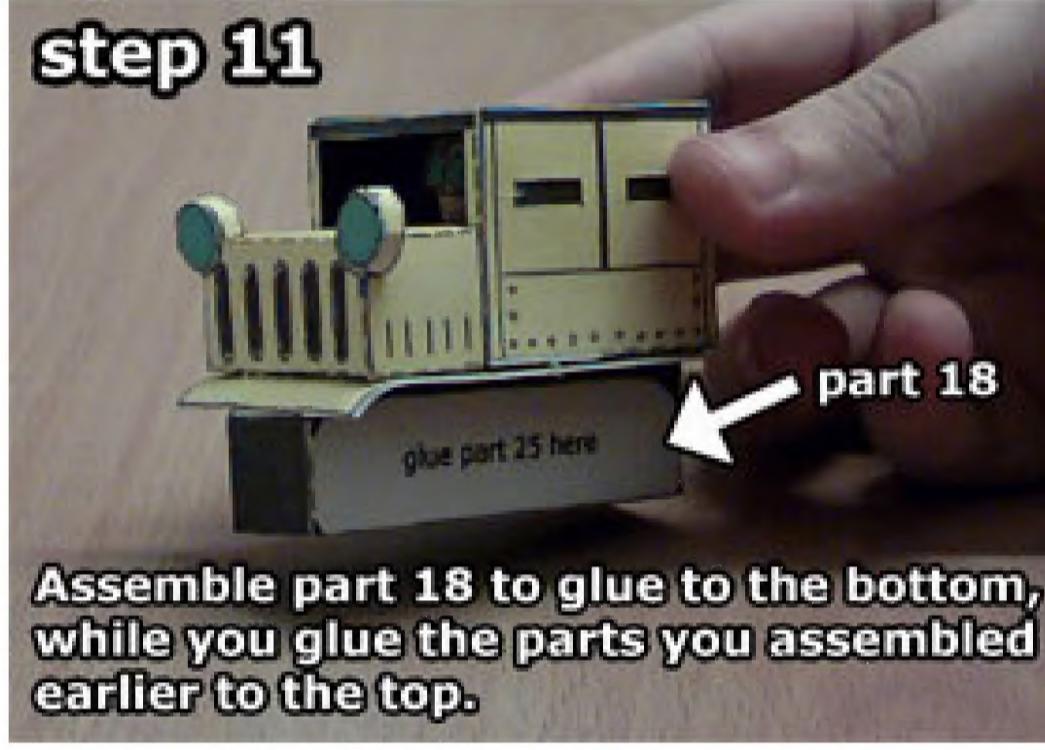

Assemble part 16 (colored side in!) glueing the driver onto the big white spot.

**step 9**

Now glue part 16 inside part 5. Push it all the way up against the roof, and against the big hole at the front.

**step 10**

Now cut out part 17 and fold over the black strips to glue them to the back. Slightly curve the front end.

**step 11**

Assemble part 18 to glue to the bottom, while you glue the parts you assembled earlier to the top.

**step 12**

Assemble both treads (parts 19-24 and 25-30, pretty self explanatory)...

**step 13**

**Yellow Comet  
APC**

...and then glue them to part 18.  
Thank you for downloading and building a Ninjatoes' paper model!!!
